Hello Alysha,

My name is Kyla Scheidt. My husband Neal and I just moved to Burford in October. We have heard about the current proposal for the high-density unit on Maple Ave. We would like to express our concern and be of help in **opposing** this proposal by Lanca. As a younger couple we intend on having kids in the near future and one of the main reasons we fell in love with Burford is the small town charm. Having a new high-density unit being built just round the corner will most certainly make that small town charm fade away quickly. We really enjoy how quiet our street is and being located on [REDACTED] means we will not be far from this proposed unit. Which will mean an increase of cars and people on and around the streets, of course increasing the noise (one of the exact reasons we moved in the first place from our previous house). We also love being self sufficient on our well water and septic tank. Another reason we are opposed to this high-density unit as this will most certainly make some impact on the surrounding houses water systems as this way of living was not designed for such a big amount of people. Some suggestions being heard about the proposal of a Cul de sac built with 7-8 single family homes would be a more appropriate solution in keeping with the values of this small quaint town. Anything more we can do to help let us know,

Thanks, and sincerely hoping we won't need to consider moving again in the future,

Kyla Scheidt
