

My concern as a resident at 54 River Road County of Brant is the water table. We have a dug well as do many of the residents on this road, and adding another home will potentially stress the amount of water available to the existing homes. We do run out of water now at times during the year and do not want this to become a worse problem. I hope the lack of water is taken into consideration when you look at a change of zoning, this is a serious concern to us.

Regards

L. Metcalfe
