THAT the LPRCA Board of Director's does now sit as a Hearing Board.

Carried

The roll was called to conduct the following Hearing under Section 28 of the Conservation Authorities Act. Stewart Patterson was absent from the call. Peter Ypma was missed in the call but was present.

The Chair gave his opening remarks and reviewed the guidelines and process to be followed for the hearing.

Hearing: LPRCA-175/23 (Kolomaya)

Leigh-Anne Mauthe introduced the applicant Jake Kolomaya and his agent Nathan Kolomaya, and Julian Stewart, project architect, then proceeded to present the staff hearing report.

An application was received to construct a non-habitable accessory structure. The land contains a two-story house, permitted by LPRCA through a hearing process in 2018, is subject to slope stability and erosion related hazards from Lake Erie and is fully regulated under O. Reg. 178/06.

Staff recommended refusal to grant a permit for this application for the following reasons:

1. The construction of a structure in the Lake Erie shoreline unstable slope and erosion hazard along Brown Street is contrary to the LPRCA policies for development in the area of the subject lands. These policies have been implemented to reduce or eliminate preventable property damage due to unstable slopes and shoreline erosion.
2. This construction of a structure affects the control of erosion in that it increases the potential for damage from slope instability and erosion.
3. The proposal is not unique; therefore, the granting of an exemption to policy could be seen as setting precedent. Similar applications may have to be permitted as a consequence.

Agent, Nathan Kolomaya addressed the board and presented on the permit application.

Staff, the agent and the proponent responded to questions from the Board.

10. New Business

a) General Manager's Report

The General Manager provided an overview of operations this past month.

The campgrounds had a successful year and closed for the season on October 15.

The latest project on the Backus Education Centre to upgrade the outside of the building is progressing well.

The Vittoria Dam Class Environmental Assessment, the Big Otter floodplain mapping and the Hydrology projects are ongoing and are scheduled to be completed early next year.

Staff are currently contacting adjacent landowners to the Haldimand Conservation Area to coordinate an effort to treat the area for Hemlock Wooley Adelgid (HWA).

In response to member Ypma's question regarding the level of concern for HWA, the General Manager explained that Hemlock isn't a dominant species within LPRCA properties but HWA has had a devastating effect in the U.S. The goal is to contain HWA to limit spread.

c) Ecological Survey Report

LPRCA contracts a qualified ecologist to survey properties for species at risk and species of concern on an annual basis. Staff retained the services of Natural Resource Solutions Inc. to complete the 2023 surveys at four LPRCA properties for a total 590.02 acres.

The Hughes, Greathead, Wilson, and Coppens-Ferris-Armstrong tracts were surveyed and are included in the 5-year operating plan for upcoming forest management activities.

Recommendations within the report will be implemented during the marking and timber harvesting process to ensure that sensitive species are not impacted, and to continue LPRCA's focus on ecologically sustainable forest management.
